

JOHN KIPLAGAT BARSIGO

FULL-STACK SOFTWARE ENGINEER | SEO | DATABASE ADMINISTRATOR

Nairobi, Kenya | johnbarsigo@gmail.com | +254 717 829305 | www.barsigo.co.ke

PROFESSIONAL SUMMARY

A certified full-Stack Software Engineer with 2 years of experience in developing responsive web applications using HTML, CSS, JavaScript, React.js, Next.js, Python (Flask) and PostgreSQL. 2 years of database design, development and management. Skilled in RESTful API development, debugging and writing clean, maintainable code. Knowledgeable in SEO and digital platform optimization, with a strong focus on building scalable and efficient user-focused software solutions.

WORK EXPERIENCE

Database Administrator

Old Kachesa Suites, Nakuru, Kenya

January 2023 – June 2025

- Managed and maintained relational databases to ensure reliability, performance and data integrity through routine database monitoring, troubleshooting, backups and optimization.
- Ensured data accuracy through validation, cleaning and consistency checks as well as maintaining compliance with data handling procedures.
- Configured database user access levels and permissions to maintain secure access control.
- Generated reports from database queries to support operational decision-making to further improve the business.

Tools: PostgreSQL

Social Media Manager

Tovuty Technologies, Nairobi, Kenya

January 2023 – April 2023

- Created and scheduled engaging content across social media platforms and designed simple graphics or edited videos to support digital content.
- Managed company social media accounts and monitored engagement metrics such as reach, impressions and interactions.

- Applied SEO principles to improve content discoverability and researched competitors and industry best practices to keep up with relevant emerging trends.

Tools: Metricool, Google Analytics, Meta Business Suite, Canva

Concepts: Rest API's, Authentication, Database Design, Responsive Design, API Integration, Debugging, Technical Documentation, OOP

Additional: SEO, Digital Platforms, Version Control Workflows

PROJECTS

Multi-Vendor Food Ordering Platform | Python (Flask), Next.js, Tailwind UI

Streamlined food ordering and vendor operations by providing a centralized platform for menu management, customer ordering and transaction processing.

Safiri Auto Fleet Management System | Python (Flask), Next.js

Improved access to transportation and asset utilization by developing a platform that allowed vehicle owners to monetize dormant vehicles through efficient booking and transaction processes.

Hostel Management System | Python (Flask), Next.js

Simplified accommodation administration by automating resident records, billing, and occupancy management processes. This improved efficiency and data organization through a centralized platform.
